Main features

Product type	Alarm system detector
Compatible with control panels	P64, S32GM, S32GE, L32
Operating frequency	868 MHz
Communication range in building	Up to 100m
Communication with hopping code	Selectable
2-way technology	Yes
Event sending (open contact, triggered input, or detected motion)	Yes
Tamper transmission	No
Battery low status transmission	Yes
Supervision transmission	Yes
Power supply	3V CR123
Battery life	~ 5 years
Overall dimensions W x H x L in mm	100 x 37
Operating humidity	0% - 70%
Environmental compliance	ROHS
Operating temperature	-10oC up to +50oC
